

# My Projects

A collection of full-stack applications, digital solutions, and design projects that demonstrate my technical expertise and problem-solving abilities.

Internship Project

Oct 2024 - Mar 2025

## Real-Time Thesis Title Selection System

Built a comprehensive full-stack system using Laravel 12, Livewire 3, WebSockets, and MySQL to improve transparency and efficiency in the thesis title selection process at IMERI FKUI. The system features real-time updates, automated notifications, and conflict prevention mechanisms.

### Key Features

- 1 Real-time countdown timer for selection periods with WebSocket integration
- 2 Live activity log system tracking all user actions and changes
- 3 Admin dashboard for monitoring and management with analytics
- 4 Conflict prevention system for title assignments and duplicates
- 5 Automated email notifications for selection updates and deadlines

### TECH STACK

Laravel 12 | Livewire 3 | WebSockets | MySQL | Tailwind CSS

✓ Impact: Enhanced transparency and eliminated manual conflicts in academic processes

## POS Application with QR Code Integration

Modern Point of Sale application designed to streamline retail operations for small businesses. Features auto-generated product codes with QR scanning, comprehensive cash management, real-time transaction logging, and role-based access control.

### Key Features

- Auto-generated product codes with QR scanning capability
- Cash management system with opening and closing balance tracking
- Real-time transaction logs and receipt printing (DOMPDF)
- Role-based access control (Cashier vs Manager roles)
- Discount management system with promotional features
- Transaction history and comprehensive reporting dashboard

### TECH STACK

Laravel 11 | Livewire 3 | Jetstream | MySQL | Tailwind CSS | DOMPDF | Vite

✓ Impact: Reduced checkout time by 40% and eliminated manual entry errors

Internship Project 2024-2025

## Company Profile Website (IMERI FKUI)

Designed and developed a fully responsive company profile website for the Center of e-Learning IMERI FKUI using WordPress and Figma. The website serves as a centralized hub for workshop announcements, online courses, research updates, and event information.

### Key Features

- Centralized workshop announcements and registration system
- Online course listings with detailed descriptions
- Research updates section for faculty publications
- Event calendar integration with Google Calendar
- Mobile-responsive design optimized for all devices

### TECH STACK

WordPress Figma Custom Plugins Responsive Design

✓ Impact: Improved institutional visibility and engagement for 500+ users

### FAQ

# FemmeSight UI/UX Design

Designed comprehensive mockups and interactive prototypes for FemmeSight, an assistive mobile application aimed at helping visually impaired women. The project focused on accessibility, intuitive navigation, and inclusive design principles to create an empowering user experience.

## Design Process

- User research and accessibility requirements analysis
- Low-fidelity wireframing and user flow mapping
- High-fidelity mockups with accessibility features
- Interactive prototyping with voice navigation
- Usability testing and iterative improvements

## TOOLS USED

Figma   Wireframing   Prototyping   Accessibility Design

 Impact: Created inclusive design solution for assistive technology

This has been the industry's standard dummy text ever since

## Muhammad Ghiffari

Full-Stack Developer specializing in Laravel, React.js, and digital solutions.
